

## AMMONIUM SULFATE

Item	Value
PRODUCT NAME	ammonium sulfate
PRODUCT IMAGE	 <p>The image shows the chemical structure of ammonium sulfate. It consists of two ammonium ions (<math>\text{NH}_4^+</math>) and one sulfate ion (<math>\text{SO}_4^{2-}</math>). The sulfate ion is represented as a central sulfur atom (S) double-bonded to two oxygen atoms (O) and single-bonded to two negatively charged oxygen atoms (<math>\text{O}^-</math>). The ammonium ions are shown as <math>\text{NH}_4^+</math> groups.</p>
