LITHIUM HYDROXIDE HYDRATE

Item	Value
PRODUCT NAME	Lithium hydroxide hydrate
PRODUCT IMAGE	The image shows the chemical structure of lithium hydroxide hydrate. It consists of a water molecule (H ₂ O) and a lithium ion (Li ⁺) and a hydroxide ion (OH ⁻). The water molecule is shown with an oxygen atom at the top and two hydrogen atoms at the bottom, connected by lines. The lithium ion is shown as "Li ⁺ " to the right of the water molecule. The hydroxide ion is shown as "OH ⁻ " below the lithium ion.
CAS NUMBER	1310-66-3
WEIGHT	41.96362
FORMULA	H3LiO2
PROPERTIES	
SAFETY
