

DAPOXETINE

Item	Value
PRODUCT NAME	Dapoxetine
PRODUCT IMAGE	<p>HCl</p> The chemical structure of Dapoxetine HCl is shown. It consists of a central carbon atom bonded to a phenyl ring, a dimethylamino group (N(CH3)2), and a propyl chain. The propyl chain is connected to an oxygen atom, which is further connected to a naphthalene ring system. The label 'HCl' is placed above the structure.
CAS NUMBER	119356-77-3
WEIGHT	341.88
FORMULA	C ₂₁ H ₂₃ NO
PROPERTIES	CAS DataBase Reference : 119356-77-3(CAS DataBase Reference)
SAFETY
