

## D-GLUCITOL

Item	Value
PRODUCT NAME	D-glucitol
PRODUCT IMAGE	The chemical structure of D-glucitol is shown in a chair conformation. The hydroxyl groups are positioned as follows: C1 has a primary hydroxyl group (-CH2OH) pointing left; C2 has a hydroxyl group (-OH) pointing up and to the left, indicated by a dashed bond; C3 has a hydroxyl group (-OH) pointing up and to the right, indicated by a solid wedge; C4 has a hydroxyl group (-OH) pointing down and to the left, indicated by a solid wedge; C5 has a hydroxyl group (-OH) pointing down and to the right, indicated by a solid wedge.
CAS NUMBER	50-70-4
WEIGHT	182.17176
FORMULA	C6H14O6
PROPERTIES	
SAFETY
